DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group IV, claim 39 and the species of compound 21 on page 21 of the specification in Paper No. 11 is acknowledged. The traversal is on the ground(s) that the methods of using the compound and the compound will encompass the same search. This is not found persuasive because as stated in the restriction requirement, the compounds can be used in materially distinct process and applicant is reminded of the extensive literature search which is not co-extensive.

Claims 1-38, 40-47 and new claim 48 are withdrawn from further consideration by the examiner as being drawn to non-elected subject matter.

The structure of claim 39 is so broad and it encompasses many different compounds. The structure is simply too broad to search. Applicants elected the compound of structure 21 on page 21 of the specification. The core structure of that elected compound was searched and that is what is examined in this application. To include the other structures encompassed by claim 39 is a search which is a serious burden on the examiner.

Art Unit: 1654

Thus the follow structure is the core structure for the search in this case:

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 39, 49-61 are rejected under 35 U.S.C. 102(b) as being anticipated by Belleau et al. '315, EP 337713, WO 9218517, or Chu et al.

The compound of the core structure is anticipated by the references.

Claims 39, 49-61 are rejected under 35 U.S.C. 102(e) as being anticipated by Belleau et al. '753, Cimpola et al., or Belleau et al. '753.

The compound of the core structure is anticipated by the references.

Claims 39, 49-61 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 00/57861.

The compound of the core structure is anticipated by the reference.
